These are commercial recipes in use in South Africa on a DAILY basis. Technical support included from Elmarie during weekday working hours - she is working with these Chemicals and Formulations for more than 30 years already. With both individual clients and companies, big and small, using the exact same formulas in the Eastern Cape and Lesotho. Currently Elmarie is branch manager of PE Chemicals in East London.

Please note that **we ONLY support recipes bought from us**. If you buy some cheap junk on the internet and spend R5,000 on raw chemicals, don't come running to us for support if you don't know what to do next, and the seller has NO IDEA why your product is turning PURPLE.

All of the best with your new venture.

The Household Ingredients team,
(083)571-2699
